

SECURE PAYMENT

To ensure the best security guarantees for the payment of your online purchases on our website, we have chosen the BNP bank with the MERCANET security system. Payment is secured by encrypted data and authorization request.

Bank's data privacy transiting between your computer and BNP server is engineered by SSL MERCANET protocol. Your sales data are separated from your bank data for more security.

With secure data transfer, Mercanet is mainly based on :

SSL (Secure Socket Layer) encrypted data by which Internet data transfer is secured.

PCI DSS requirement respected, there's no knowledge of cards data.

3D secure device, card's holder authentication reducing fraud risk

These security devices are completed by others controls during the (systematic) authorization request to the bank :

credit card expiration date check

Security code check

Absence of the credit card in the stop payment list control

FORM OF PAYMENT VARIED

With Mercanet, we offer you the possibility to pay with a large choice of credit cards :

Credit Cards :

CB

Visa

MasterCard
